

Product Description

Low voltage incandescent bulb

This low voltage incandescent bulb is an incandescent bulb designed specifically for low-voltage environments, covering models such as 12v incandescent light bulb and 24v incandescent bulb.

Advantage

- Safety

Todaybulb's Low voltage incandescent bulb works at a low voltage, which greatly reduces the risk of electric shock. It is especially suitable for use in outdoor, humid environments or areas easily accessible to children, with more guaranteed safety.

- Strong adaptability

Todaybulb's Low voltage incandescent bulb includes common low-voltage models such as 12v incandescent light bulb and 24v incandescent bulb, which can adapt to a variety of low-voltage lighting systems and meet power needs of different equipment.

- Suitable light

Todaybulb's Low voltage incandescent bulb emitted is soft warm white lights. Like 12 volt incandescent indicator lights, they can clearly convey indication information without being too dazzling.

- Easy install

Todaybulb's Low voltage incandescent bulb could be easily to fit in any light fixtures with medium screw socket or bayonet.

Low voltage incandescent bulb

Feature

- ✓ Dimmable
- ✓ 100% CRI
- ✓ 12V,24V,36V,48V are available
- ✓ Warm white
- ✓ 360D beam angle
- ✓ 1000 hours life span

Application

- Landscape lighting

low voltage incandescent landscape lighting is an important application field. It can be used for decorative lighting of outdoor landscapes such as courtyards, parks, and gardens, outlining the contours of the landscape and creating a warm and romantic night atmosphere.

- Specific scene lighting

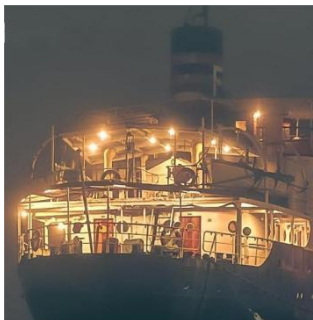

In some places that require low-voltage power supply, such as trailer boat, trucks, 12v incandescent light bulb and 24v incandescent bulb can provide stable lighting to meet daily lighting needs.
